

3DE_Installation of third-party plug-ins

Download plugin

Option 1:

https://github.com/hsucode1/CATIA_AEC_ADDIN

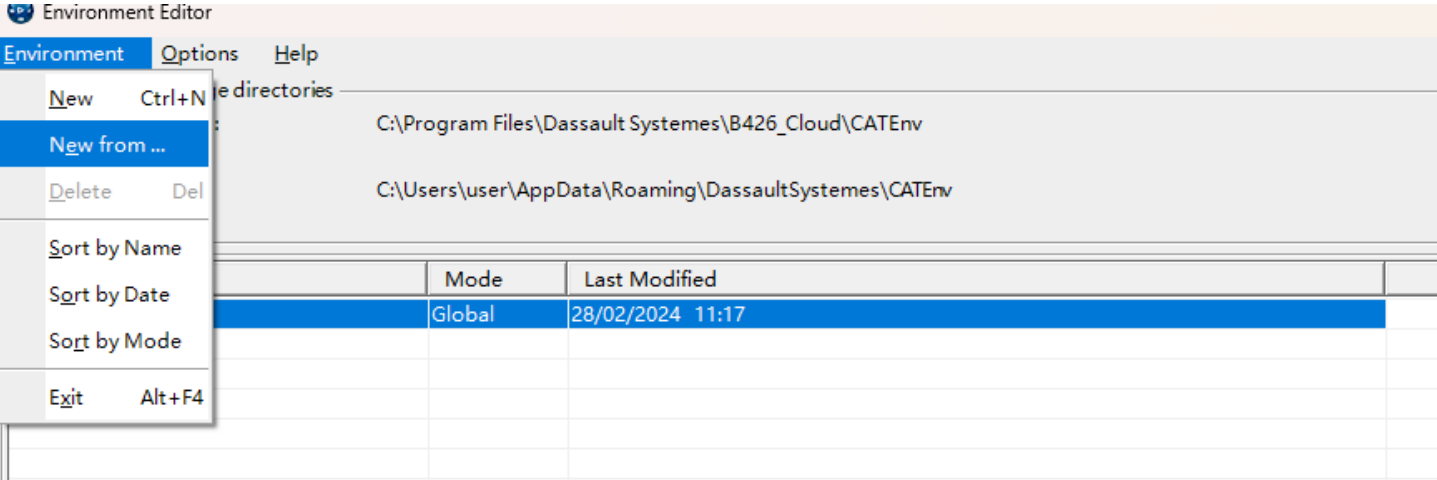

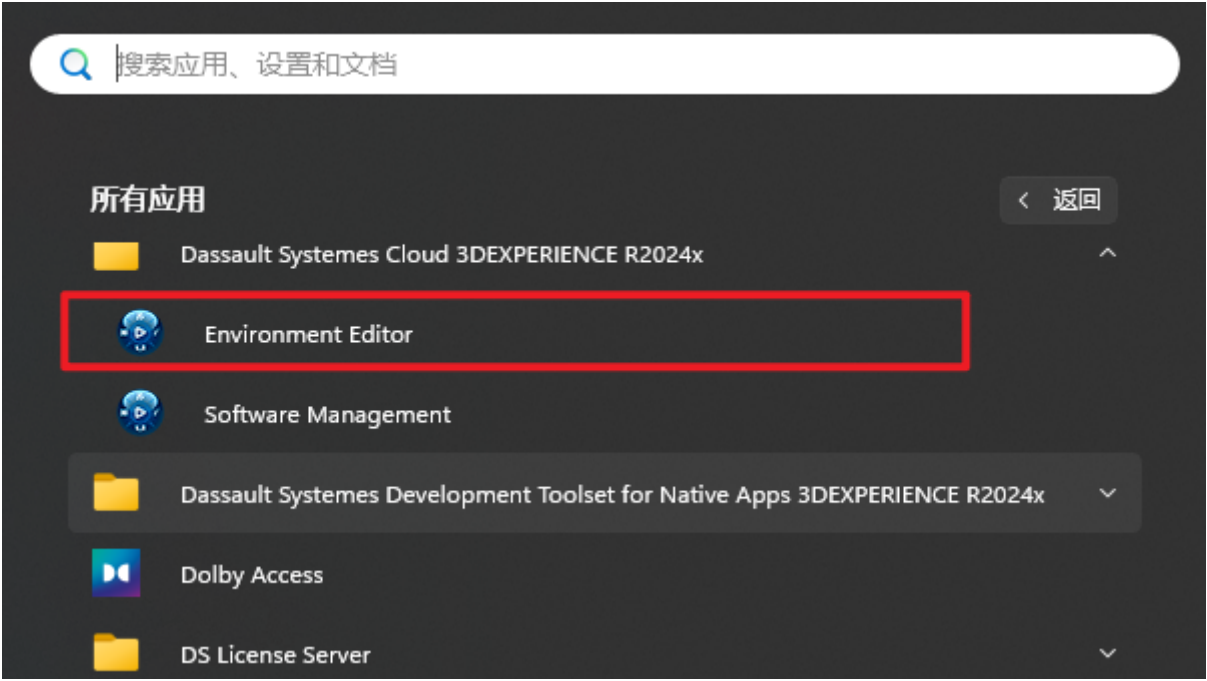

The screenshot shows the GitHub repository page for **CATIA_AEC_ADDIN**. The repository is public and has 1 branch (main). The file list shows folders **B426/win_b64** and **screenshot**, and files **LICENSE**, **README.md**, **git_upload.bat**, and **help.txt**. The README section is visible, showing the title **CATIA_AEC_ADDIN**, the description **3DEXPERIENCE AEC Addin**, and a link to the repository: https://hsucode1.github.io/CATIA_AEC_ADDIN.github.io/. A red box highlights the **Download ZIP** button in the **Code** dropdown menu.

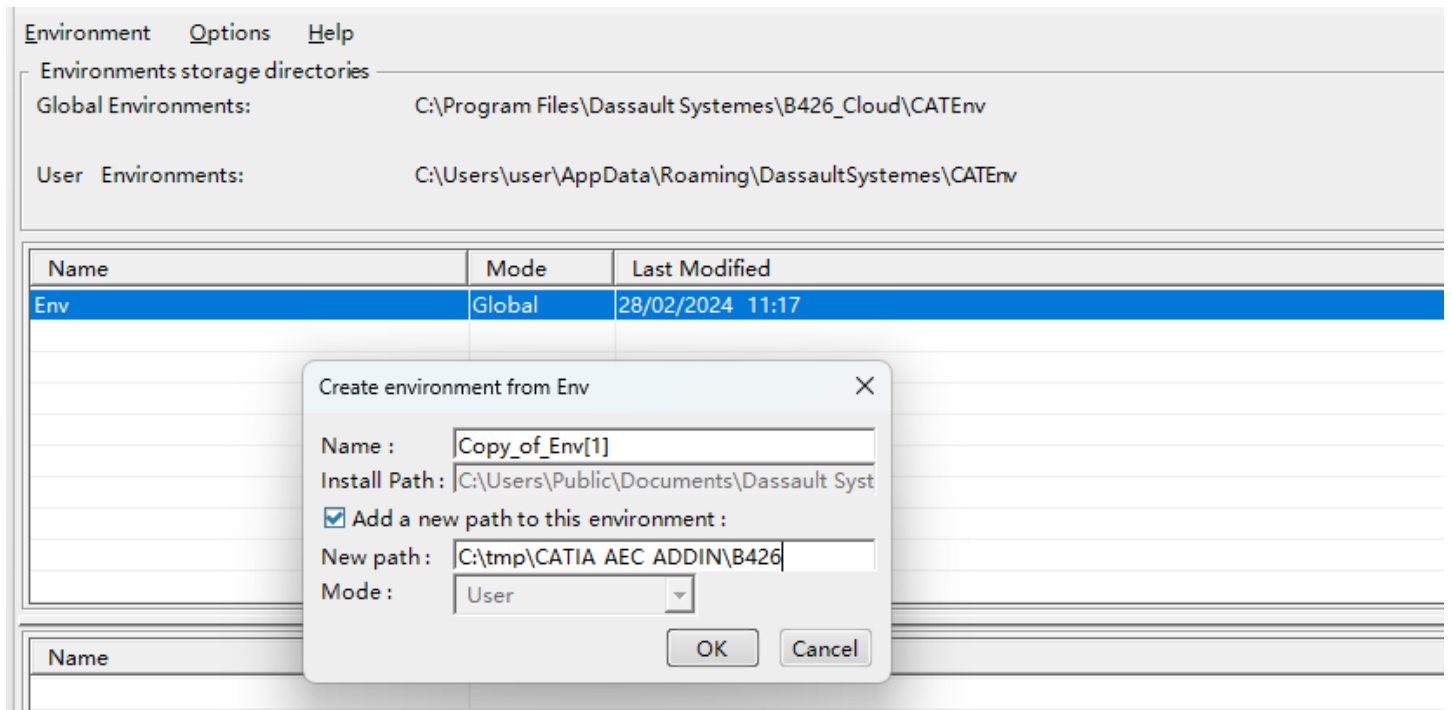

Option 2:

Recommend using git to download

```
1 cd /d c:\apps\  
2 git clone https://github.com/hsucode1/CATIA_AEC_ADDIN.git
```

Click on this shortcut

Go to the following folder

%appdata%\dassaultsystemes\catenv

Copy the txt file inside to the catia installation location:

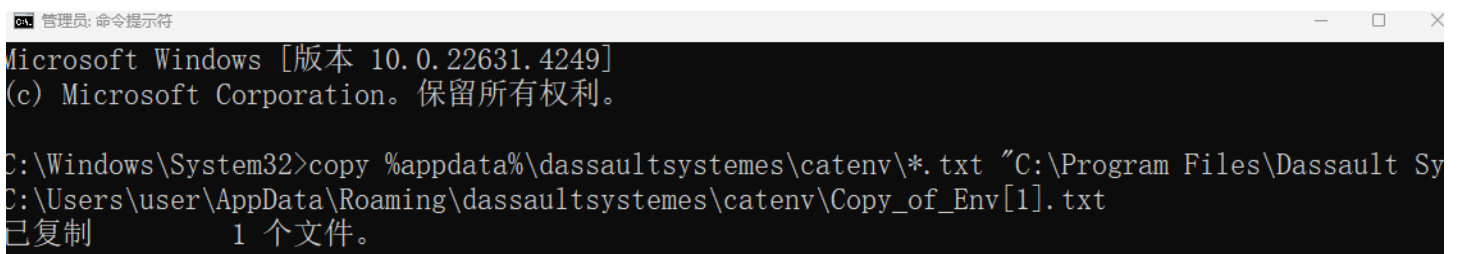

C:\Program Files\Dassault Systemes\B426_Cloud\CATEnv

This installation location needs to be modified according to your own computer, If you don't have computer modification privileges, it is not recommended to install to the default location, can be set to

C:\APPS\DS\B426_Cloud

Or use the command line to make a copy, which is convenient

```
1 copy %appdata%\dassaultsystemes\catenv\*.txt "C:\Program Files\Dassault Systemes\B426_Cloud\CATEnv"
```

Backup the original file and change the name of the copied file to Env.txt.

<input type="checkbox"/> 名称	修改日期	类型	大小
 Env-back.txt	2024/2/28 11:17	文本文档	6 KB
 Env.txt	2024/10/29 10:46	文本文档	7 KB

Launch CATIA to use the plug-in.
